

SEALANTS

Product Information

Use: Blocks moisture intrusion.

Three Types: **Backer Rod**
Seal Tape
Triangular Adhesive

Backer Rod

- EIFS-approved for sealing joints.
- Resistant to moisture/freeze-cycle problems.
- Non-absorbing outer skin with a high-resilient interior of closed cells.
- Offered in three sizes: SR38, $\frac{3}{8}$ " x 1,400'
SR58, $\frac{5}{8}$ " x 550'
SR78, $\frac{7}{8}$ " x 330'

Seal Tape

- Designed to seal off weather, moisture, vapor, air, sound, and dust.
- An open-cell tape which comes pre-compressed and is designed to expand within minutes to provide a tightly sealed joint.
- Used in wide range of temperatures.
- DST34 19.68' per roll/compresses to $\frac{1}{4}$ ".

Triangular Adhesive

- Primarily used in EIFS repair work. Resealing window.
- Works the same as Backer Rod and Seal Tape. It is shaped as a triangle.
- Best used in corner joints. Ex: Door next to extruded wall/window.
