**FEMA WIRE 1.5 Foam Shaper**

Economical manual abrasive wire foam shaper for cutting soft and rigid polyurethane foams. Operates by following a template shape.

**FEMA VS Semi-Automated Vertical Saw**

Fully manual entry level band saw. Double level blade allows cutting in both directions.

**FEMA AVS Automatic Vertical Saw**

Fully manual entry level band saw. Double level blade allows cutting in both directions.

**FEMA SVS Semi-Automated Vertical Saw**

Double level blade allows cutting in both directions. The SVS is a semi-automatic cutter. The machine has a scrolled blade guide for easy adjustment.

**FEMA VS Vertical Saw**

Semi-Automated Vertical Saw. The machine has a powered blade guide for easy adjustment.

**FEMA VS Vertical Saw**

Automatic Vertical Saw.

Automatic Vertical cutter for cutting different thickness slabs from PU block. Dual bevel blade allows for cutting in both directions with high precision and high speed. The touch screen control varies the cut speed, quantity and dimension of the sheets.

**CONVOLUTER Geometric Patterns**

Designed specifically to split and shape foam for areas such as automotive, mattress padding and packaging. Convoluted foam is often referred to as egg crate foam.

**CAROUSEL Multiple Block Slitter**

An automatic horizontal slitter designed to cut multiple polyurethane blocks up to 55 inches high with a speed range of 32 ft./min to 328 ft./min.*
Demand Products Inc. is the exclusive distributor in North America for FEMA Italian Cutting Systems
Continuous Blade Machines • Oscillating Blades Fast Wire Machines • Slitters • Convoluters

FEMA Italian Cutting Systems is a 25-year-old, proven leader in CNC foam cutting equipment. Their teams of technicians, builders, mechanics and software engineers is dedicated to the manufacture of vertical and horizontal contour cutting machines that feature continuous blade and oscillating blades, fast wire machines, band saws, convoluters and carousels as well as production line foam cutting. Total Quality is what sets FEMA Italian Cutting Systems apart from the competition.

**ELEVATING EXPECTATIONS IN FOAM CUTTING**

**GIOTTO**

**GIOTTO EVO**
Horizontal CNC continuous blade contour cutter with an option to add an oscillating blade. The EVO is equipped as the flagship model, with blade guides and block clamping features. Features an automatic rotating turn table. Cuts rigid, semi-rigid and flexible polyurethane foam.

**GIOTTO HCS**
Horizontal Continuous and Oscillating Cutting Horizontal CNC continuous blade contour cutter with an option to add an oscillating blade. Features a manual rotating turn table. Cuts rigid, semi-rigid and flexible polyurethane foam.

**MICHELANGELO SCV**
Vertical Continuous Cutting Vertical CNC continuous blade machines for high quality precision contour and detail cutting. High speed cutting up to 213 ft/min, up to 48-inch height. Cuts rigid, semi-rigid and flexible polyurethane foam.

**COMBOLINE**
Horizontal and Vertical Integration The Comboline pairs up the horizontal Giotto HCS and the vertical Michelangelo SCV. Connected by a transfer conveyor, the Comboline allows you to operate the Giotto and Michelangelo cutters independently, optimizing production time and increasing the efficiency of the system.

**PROVEN RELIABILITY**

Delivering Quality
Demand Products has led the way in foam cutting equipment sales, service and installation for over 30 years. Beginning with introducing the first hot wire foam cutting table in the 1980’s and growing to offer a full range of foam handling equipment solutions from cutting to grinding to recycling technology.

Our technicians are fully trained to address all issues. They are professional, courteous and dedicated to making your job as easy as possible on whatever we cut or service.

Demand Products is the company to call when you need to have equipment up and running as quickly as possible on an installation or service call.
